

Service Overview

The Arctera Insight Platform Services (“Service(s)”) provide software as a service in an eDiscovery, supervision, or information governance platform, as further described in this service description (“Service Description”).

This Service Description document, with any attachments included by reference, is part of any agreement which incorporates this Service Description by reference (collectively, the “Agreement”), for those Services which are described in this Service Description and are provided by Arctera.

Add-On Options

Service	Meter	Description
Data Import (Ingestion) Option	Per Gigabyte	This is a one-time fee based on the amount of data the Customer needs to import. The import option allows a Customer to import legacy Emails and is only available for a Suite containing eDiscovery or Personal Archive. Additional considerations are below this table.
Self-Service Ingestion Option	Per Gigabyte	This is a one-time fee based on the amount of data the Customer needs to import. Under this option, the Customer will perform the ingestion of legacy Emails into the archive. This option is only available for a Suite containing eDiscovery or Personal Archive.
Mail Reassignment Option	Per Gigabyte	This is a one-time fee where Arctera will reassign unassigned legacy accounts, saved searches, and tags within a Customer's archive where the amount to be reassigned exceeds the self-service limits.
Data Export (Extraction) Option	Per Gigabyte	Data export is available to a customer whose needs and timing exceed the self-service export capabilities within the Service. The Service data management team will perform a data export from the archive. Data extraction is only available for a Suite containing eDiscovery. Additional considerations are below this table.
Archive Re-index Option	Per Gigabyte	An archive re-index allows a customer to request a single re-index of their existing archive. This option is particularly useful for a customer who wants to apply classification policies to previously-archived information.
Enterprise Vault Read Only Collector	Per (on-prem) User	Enterprise Vault Read Only Collector allows a customer to retain access to data within an on-premise Enterprise Vault archive while such data is being migrated. No new journaling is allowed. Terms around use and metering of the Enterprise Vault Read Only Collector are provided at https://www.arctera.io/license-agreements .
Transcription Option	Per Hour Per Month	This option allows certain types of media files to be transcribed and those transcriptions then archived into the Service on a per hour per month basis and is subject to Overages if Customer uses more than purchased in any given month, and any unused amounts will expire at the end of each month. For the avoidance of doubt, Customer is not entitled to refunds for any prepaid, unused Transcription services purchased. Please note that multiple attendees in the same meeting will each count toward the overall hours used in a month.
Additional Storage	Per Gigabyte or Per Terabyte	Additional Storage can be used: <ul style="list-style-type: none"> to provide more overall storage to a Customer's Service environment in 1GB or 1TB increments to avoid exceeding the Shared Storage Allocation; or to scan and monitor additional content at Customer's source using Data Insight, up to the quantity of gigabytes or terabytes purchased.

Additional Considerations

Services and features have been rebranded to Arctera. Please see the below tables for a one-to-one mapping.

Service Name	Previous Name
Arctera Insight Archiving	Veritas Alta Archiving
Arctera Insight Capture	Veritas Alta Capture
Arctera Insight eDiscovery	Veritas Alta eDiscovery
Arctera Insight Information Governance	Veritas Alta Information Governance
Arctera Insight Surveillance	Veritas Alta Surveillance
Arctera Data Insight	Veritas Alta Data Insight

Feature Name	Previous Name
Arctera Insight Management Console	Veritas Alta View Compliance & Governance
Arctera Insight Classification	Veritas Alta Classification

Data Import/Ingestion Option. The Data Import/Ingestion Option allows Customer to migrate and ingest existing legacy Email data into Customer’s archive, combining both ingested legacy Email and new Email streams within the archive. All work is done remotely. Please note that all Customer Data ingested will count toward the Shared Storage Allocation. If Customer is moving from an on-premise Enterprise Vault environment, Arctera will use Direct Migrator as part of the ingestion process, a feature within the Service, to move that data into the Service archive.

For Direct Migrator ingestions:

- Customer’s Enterprise Vault environment must be in stable and working order, including all indexes if applicable, prior to these Services.
- Arctera requires independent remote access to the Enterprise Vault and extraction environment such as via VPN or Citrix to the migration and SQL servers
- Decommissioning the existing legacy Enterprise Vault environment is out of scope for these Services.
- Please see the Direct Migrator Services terms at <https://www.arctera.io/license-agreements> for more details around Arctera’s and Customer’s responsibilities during the Direct Migrator process.

For all other ingestion activities:

- This Service requires active participation by Customer to plan, analyze and execute an ingestion plan.
- Customer must transfer Email data to be ingested via courier or via SFTP where applicable and available. All data sent via a drive should be provided in an encrypted form and Customer must provide the decryption key, per instructions from Arctera.
- Customer can extract the data and provide it in any compatible format from supported repositories.

January 2025

- With Customer's guidance, this Service assigns Users to each Email imported. Email that cannot be directly assigned to a specific User are assigned to a single mailbox within the archive. Once email is assigned to this mailbox, it cannot be moved or migrated to another mailbox.
- All migration activity can be logged and audited through a chain of custody protocol to provide integrity of Customer's Email records.
- Arctera cannot guarantee the time it will take to import the data once received.

Arctera is not responsible for failure to import data that is corrupt when received from Customer.

Customer understands that any Data Import/Ingestion Option will take considerable time, will run concurrently with the Services Customer has purchased, and that Customer will be able to access and use these other Services purchased in the meantime in accordance with this Service Description. Customer acknowledges and agrees that it is not entitled to any refund or discount on these Services for any time taken or delays encountered with the delivery of the Data Import/Ingestion Option.

Customer has thirty (30) days following the completion of the migrated data ("Migrated Data") to review, fully test, and provide written notice of and reason for rejected of any Migrated Data or some portion thereof. Upon such notice, Arctera shall work with Customer to plan and perform any reasonable corrective action. If Arctera cannot provide the corrective action, Customer and Arctera agree that no further remediation is required, and Customer is released from payment for that portion of the rejected Migrated Data. Customer is not released from payment for any Migrated Data that has not been rejected within the 30-day period. This is the sole and exclusive remedy for any rejected Migrated Data.

Data Export/Extraction Option. Unless otherwise agreed to by the parties, extraction is available at Arctera's then-current per gigabyte pricing. Customer has thirty (30) days following the date the exported/extracted Customer Data ("Exported Data") is first made available to Customer to review and provide written notice of and reason for rejection of the Exported Data or some portion thereof. Upon such notice, Arctera will work with Customer to plan and perform any reasonable corrective action. If Arctera cannot provide the corrective action, Customer and Arctera agree that no further remediation is required, and Customer is released from payment for that portion of the rejected Exported Data. Customer is not released from payment for any Exported Data that has not been rejected within the 30-day period. This is the sole and exclusive remedy for any rejected Exported Data.

Software Components

Some Services may require use of a Software Component. Customer's right to use such Software Component begins when the Service is activated and ends when Customer's right to use the associated Service terminates or expires. Customer must uninstall a Software Component when Customer's right to use the associated Service terminates or expires. Arctera may disable the Software Component at that time.

Customer Responsibilities

Arctera can only perform the Service if Customer provides required information or performs required actions. If Customer does not provide/perform per the following responsibilities, Arctera's performance of the Service may be

delayed, impaired or prevented and/or eligibility for Service Level Agreement benefits may be voided, as noted below.

- **Setup Enablement:** Customer must provide information required for Arctera to begin providing the Service.
- **Adequate Customer Personnel:** Customer must provide adequate personnel to assist Arctera in delivery of the Service, upon reasonable request by Arctera.
- **Customer Portal:** Customer can access a web interface Service portal by using a secure password protected login. This Service portal provides the ability for Customer to configure and manage the Service, access reports, and view data and statistics when available as part of the Service. Customer must configure the features of the Service through the web interface Service portal or default settings will apply. In some cases, default settings do not exist, and no Service will be provided until Customer chooses a setting. Configuration and use of the Service(s) are entirely in Customer's control.
- **Unassigned Licenses.** The Unassigned Legacy Folder plays a critical role in ensuring the Customer compliantly captures all messages flowing into its Service archive, even if a new User hasn't been provisioned within the archive yet. This folder captures all messages that do not match an existing email address provisioned within the archive. Administrators are encouraged to review the contents of the folder on a regular basis to confirm that all messages are being properly archived. This folder counts as one User in the Customer's total number of Users since the messages contained in the folder consume storage space within the archive.
- **Mail Reassignment.** Mail reassignment allows an administrator in a Customer's archive to reassign unassigned legacy accounts, saved searches, and tags in a self-service fashion up to the limits as detailed at https://www.veritas.com/support/en_US/article.100049582.
- **Electronic Discovery Capabilities.** If a customer has subscribed to a Suite with eDiscovery, that customer may perform electronic discovery requests on its Customer Data in order to extract an offline copy of that request. However, for Arctera to preserve the integrity of the Service and maintain its Service Uptime commitments, these discovery requests are limited. Though subject to change, as of the date of this Service Description, discovery requests are limited to no more than two hundred thousand (200,000) emails at a time. Arctera reserves the right to further limit or even refuse discovery service requests if the volume of requests is degrading the overall service experience for Arctera's other customers. Please note these requests are only available during the Service term of the Agreement and Customer's access to the Service in all capacities ends when the Service term ends.
- **Compliance:** Customer is responsible for all activities that occur in User accounts and for its Users' compliance with the Agreement and with the Acceptable Use Policy available at <https://www.veritas.com/company/legal/acceptable-use-policy>. If Customer becomes aware of a User's violation of the Agreement or Acceptable Use Policy, Customer must notify Veritas as soon as reasonably practicable.

January 2025

- Security Vulnerability or Incident. If Customer becomes aware of any actual or potential security vulnerability or incident, Customer must immediately report it to Arctera through the process set forth at <https://www.arctera.io/security> or successor address.
- The Service does not replace Customer's need to backup Customer's mail server(s). If Customer needs to rebuild a mail server, it should rebuild the mail server from backup data rather than from the archive.
- By default, Arctera automatically generates and stores a unique encryption key for each customer at the time of provisioning to protect Customer Data. If Customer chooses to provide Arctera with its own encryption key for encrypting Customer Data, Customer is solely responsible for (1) providing Arctera with access to that encryption key during provisioning in order for Arctera to be able to provide Service (Service cannot be provided without such access), and (2) independently storing and backing up that encryption key, as ALL CUSTOMER DATA WILL BE LOST AND IRRETRIEVABLE IF CUSTOMER'S ENCRYPTION KEY IS LOST. Customer may revoke Arctera's access to its encryption key at any time, but in the absence of a material breach by Arctera to be handled by the parties in accordance with the terms of the agreement, Customer will remain responsible for any pre-committed term and associated fees.
 - Please note that metadata related to Customer Data, such as indexing, database information, or log files will still be independently encrypted with a separate Arctera-managed key.
 - Arctera cannot retroactively apply a new encryption key to Customer Data in an existing Tenant. Please reach out to Arctera for paid-for migration services to move existing Customer Data to a new Tenant that uses Customer's own encryption key.
 - Data Insight is encrypted with a Veritas-managed key and does not support encryption via a customer-provided key. Further, metadata created by Data Insight is not encrypted.
- Extraction Capabilities. Customer may need an offline copy of its Customer Data at Service expiration, when the Customer Data exceeds the retention period, or as otherwise needed. Customer data extraction is only available, however, if a customer has subscribed to a Suite with eDiscovery. Customer should reach out to the Service data management team at cloud.dm@arctera.io to request a quote for Data Export (Extraction) Option at Arctera's then-current per GB rates. Customer must reach out to Arctera promptly before Service expiration to request Customer Data extraction to avoid Customer Data being permanently deleted in accordance with the Data Decommissioning section.

Supported Platforms and Technical Requirements

Each Service is compatible only with approved versions of on-premise mail servers and hosted mail services set forth in the current compatibility list at https://www.veritas.com/support/en_US/article.100040129.

Service-Specific Terms

Assistance and Technical Support

Customer Assistance. Arctera will provide the following assistance as part of the Service:

- Receive and process orders for implementation of the Service
- Receive and process requests for permitted modifications to Service features; and
- Respond to billing and invoicing questions

Technical Support. The following technical support (“Support”) is included with the Service.

- Support available on a twenty-four (24) hours/day by seven (7) days/week basis to assist Customer with configuration of the Service features and to address issues and questions with the Service and any applicable Service Components.

Maintenance. The Service is monitored on a twenty-four (24) hours/day by seven (7) days/week basis for hardware availability, service capacity, and network resource utilization. The Service is also regularly monitored for service level compliance and adjustments are made as needed. Arctera must perform maintenance on the Service Infrastructure in order to provide the Service in accordance with the Agreement. The following applies to such maintenance:

- *Planned Maintenance.* For Planned Maintenance, Arctera will use commercially reasonable efforts to give Customer seven (7) calendar days’ notification, via email, or SMS or phone as requested. Arctera will use commercially reasonable efforts to perform Planned Maintenance at times when collective customer activity is low, in the time zone in which the affected Infrastructure is located, and only on part, not all, of the network. If possible, Planned Maintenance will be carried out without affecting the Service. During Planned Maintenance, Service may be diverted to sections of the Infrastructure not undergoing maintenance in order to minimize disruption of the Service. “**Planned Maintenance**” means scheduled maintenance periods which during which Service may be disrupted or prevented due to non-availability of the Service Infrastructure.
- *Emergency Maintenance.* Where Emergency Maintenance is necessary and is likely to affect the Service, Arctera will endeavor to inform the affected parties in advance via email, or SMS or by phone no less than one (1) hour prior to the start of the Emergency Maintenance. “**Emergency Maintenance**” means unscheduled maintenance periods which during which Service may be disrupted or prevented due to non-availability of the Service Infrastructure or any maintenance for which Arctera could not have reasonably prepared for the need for such maintenance, and failure to perform the maintenance would adversely impact Customer.

Automatic Renewal and Service Cancellation

Unless specified in the Agreement or Customer has otherwise opted out of auto-renewal at the time of initial purchase using Arctera's then-current opt-out processes, the Service renews automatically as set forth in the Agreement, unless Customer cancels as follows:

- Customer may opt out of automatic renewal, and therefore terminate, by providing Arctera notice of non-renewal or cancellation at least ninety (90) days prior to the end of Customer's Initial Period (sometimes called the Minimum Period) or a then-current Renewal Period (each, a "Term").
- Such notice of non-renewal or cancellation must be sent to the following address (or replacement address as published by Arctera): returnsandcancellations@arctera.io. For clarity, a notice of non-renewal or cancellation takes effect upon the expiration of the then-current Term and does not terminate the Service until the end of Customer's then-current term. Any notice given according to this procedure will be deemed to have been given when received.
- Customer should review the implications and processes related to cancellation prior to cancelling as outlined at https://www.veritas.com/support/en_US/article.100042694.html.

Please note that if Customer has opted out of auto-renewal at the time of purchase ("DNR"), Customer will be responsible for submitting a timely renewal order. Any processing delays, late renewals, channel issues or other problems with the renewal order may cause the Service to expire and any Customer Data stored by the Service shall be deleted in accordance with the Data Decommissioning section. Not submitting a timely renewal order is deemed the same as a cancellation notice, and Customer Data and the Customer Tenant will be permanently deleted in accordance with the Data Decommissioning section.

Automatic renewals are subject to a renewal uplift, except that any renewal order of a DNR purchase or purchase provided under a promotional discount is subject to the then-current pricing.

Data Decommissioning

Customer Data will be decommissioned in the following events, or as otherwise set forth in this Service Description:

- Service cancellation (either by request of Customer or in the event of non-payment)
- Service termination or expiration
- License reduction at renewal

Customer loses all access to the Service and its Customer Data immediately following suspension, expiration, or termination of Services. If Customer needs a copy of their Customer Data, Customer must request a quote for such Customer Data from cloud.dm@arctera.io prior to the Data Decommissioning event.

Decommissioned Customer Data will be deleted in accordance with Arctera's standard deletion practices within thirty (30) days of the Data Decommissioning event and is irretrievable thereafter.

Shared Storage Allocation

For Services sold on a Per User per Month meter, the maximum storage allocation permitted is 15 GB per User. Purchasing multiple Arctera Insight Services does not increase this per User allocation but a Customer can purchase Additional Storage to obtain more overall storage. The storage allocation is aggregated across all Users as determined by multiplying the quantity of Users purchased by the allocation per User. This aggregate storage allocation is then added to any additional storage Customer may have purchased and then enforced at the Tenant level for the total shared storage allocation ("Shared Storage Allocation"). Customer Data from non-user mailboxes and mailboxes of inactive users and guest users will contribute toward the storage allocation. Customer can monitor its remaining Shared Storage Allocation within the web interface Service portal. If Customer exceeds the Shared Storage Allocation, Customer must purchase additional storage.

Overages

If Customer's actual usage exceeds its contracted quantity, then Arctera will invoice for excess Service use and Customer will promptly pay for such excess use. In such an event, Arctera will charge fees for the excess use at the same rates for the current Term monthly in arrears or in accordance with Arctera's then-current processes.

Usage Reduction

Customer cannot reduce the agreed upon quantity of users or FETB during any existing term but may only reduce that quantity at renewal time. Absent evidence of a company divestiture, split or other entity realignment, Arctera reserves the right to reduce Service quantities as a one-time courtesy by no more than ten percent (10%) of the existing amount at any given renewal time or as otherwise set forth in Arctera's then-current processes. Pricing will be adjusted for the lower volume which shall result in increased per unit pricing, and prior discounting will not be available. Customer Data associated with the removed licenses will not be decommissioned but will count toward Customer's adjusted Shared Storage Allocation based on the new quantities. Customers must also reduce the volume of content it scans at source using Data Insight to avoid overages. Customers who wish to retain the data from these previous licenses will need to contact the Services data management team at cloud.dm@arctera.io for a data extraction quote.

Additional Service Requirements

- Customer shall comply with all applicable laws with respect to use of the Service(s). In certain countries it may be necessary to obtain the consent of individual personnel. Configuration and use of the Service(s) is entirely in Customer's control, therefore, Arctera is not liable for Customer's use of the Service(s), nor liable for any civil or criminal liability that may be incurred by Customer as a result of the operation of the Service.
- Arctera may update the Service at any time in order to maintain the effectiveness of the Service.

- The Service (including any Software Components) may use open source and other third-party materials that are subject to a separate license. Please see the applicable Third-Party Notice, if applicable, at <https://www.arctera.io/license-agreements>.
- If Customer has not provided the requested provisioning information to allow Arctera to provide the Service, Arctera reserves the right to begin charging for the Service within thirty (30) days of receipt of an order for the Service.
- Customer Data shall be archived during the Term of the Service. Before the end of the Service term or upon termination of the Service, Customer shall make a written election for Arctera to: (i) delete Customer Data at no charge in accordance with the Data Decommissioning section; or (ii) purchase one-time Data Extraction/Export services at Arctera's then current per GB rates ("Data Extraction"), provided Customer had a Suite with eDiscovery. In the event Customer fails to provide written instruction to Arctera as provided in the preceding sentence, Customer Data will be decommissioned in accordance with the Data Decommissioning section. Arctera reserves the right, in its sole discretion, to refuse any Data Extraction request until Customer's account no longer has outstanding Services fees.
- Retention Periods. While Customer's subscription is active, Customer Data is maintained according to the Customer-defined retention/expiry period, except where Customer has purchased WORM storage subject to either a 7- or 10-year retention as noted in the Service Order. Customer data is maintained for the duration of that retention period based on the mail date of the Customer Email. Thereafter, Customer Data will be deleted after the expiry of that retention period and will no longer be accessible at all. Regardless of the retention period purchased or set by Customer, all Customer Data is subject to deletion upon termination or expiration of the Agreement.

Service Level Agreement ("SLA")

- Arctera's Service Level Agreement shall provide 99.9% or higher Uptime for the Service.
- "Uptime" is defined as the time during which a Customer is able to Access the Service, as reported by the Arctera incident management system. "Access" is defined as a Customer being able to successfully login and use the Service functionality, as outlined in this Service Description.
- Uptime is measured every calendar month as a percentage value. The monthly Uptime percentage is the total number of minutes of Uptime achieved in a calendar month, divided by the total number of minutes in a calendar month.

Exclusions

- This SLA will not operate: (i) during periods of Planned Maintenance or Emergency Maintenance, periods of non-availability due to force majeure or acts or omissions of either Customer or a third party; (ii) due to overall internet congestion, slowdown or unavailability; (iii) bandwidth or other limitations caused by Customer internet service provider (ISP); (iv) unavailability of generic internet services (e.g. DNS servers);

(v) a result of Customer equipment or third party computer hardware, software or network infrastructure not within the sole control of Arctera; (vi) during any period of suspension of service by Arctera in accordance with the terms of the Agreement; (vii) where Customer is in breach of the Agreement (including without limitation if Customer has any overdue invoices); or (viii) Customer has not configured the Service in accordance with the Agreement.

Service Credits

- If the Service does not meet the stated SLA, Customer may submit a Service Credit Request for a Service Credit. Service Credits are calculated as follows:

Availability	Service Credit ¹
≥99.9%	0%
>=99.0% but <99.9%	10%
<99.0%	25%

¹ Service Credits are calculated as a percentage of the monthly cost of the service when the outage occurred (regardless of licensing model). Service Credit percentages in the table above are an aggregate maximum for all SLA claims for a single Service in a given calendar month. Service Credits only apply if the Customer’s account is current and not suspended for non-payment or other non-compliance with terms. Service Credits are provided to the party receiving the Arctera invoice.

- To successfully claim a Service Credit, Customer must submit a Service Credit Request within fifteen (15) business days of the end of the calendar month in which the suspected SLA non-compliance occurred. The request must specify which service was impacted, and the dates and times of service unavailability.
- Arctera will validate the information provided by the Customer and if a Service Credit is due, it will be applied against the next Arctera invoice for the Customer’s Service. If a Service Credit is successfully claimed for more than one Arctera Service, then the quantity will equal the number of credits applied and the total will be aggregated to reflect the total value of the Service Credits claimed in that measurement period.
- The remedies set out in this SLA shall be Customer’s sole and exclusive remedy in contract, tort (including without limitation negligence) or otherwise, with respect to this SLA.

Privacy Notice

In connection with Customer’s use of the Service, Arctera and Arctera’s licensors, subcontractors, or agents may collect, retain, disclose, and use certain information as set out in the privacy notice available at <https://www.arctera.io/privacy>. By using the Service, Customer agrees to the terms contained in such privacy notice.

Definitions

Capitalized terms used in this Service Description, and not otherwise defined in the Agreement or this Service Description, have the meaning given below:

“**Administrator**” means a Customer User with authorization to manage the Service on behalf of Customer. Administrators may have the ability to manage all or part of a Service as designated by Customer.

“**Customer Data**” means the data Customer stores or archives in the Service.

“**Email**” means any inbound or outbound SMTP message passing through a Service.

“**FEGB**” refers to the size of data on the storage device, measured in front-end gigabytes (GB), which is under monitoring by Data Insight.

“**GB**” refers to the total aggregate amount of uncompressed data in gigabytes. One gigabyte equals 1024 megabytes of data.

“**Infrastructure**” means any Arctera or licensor technology and intellectual property used to provide the Services.

“**Service Component**” means certain enabling software, hardware peripherals and associated documentation which may be separately provided by Arctera as an incidental part of a Service. Any additional rights and obligations with respect to the use of Service Components shall be as set forth in this Service Description.

“**Service Credit**” means the amount of money that will be credited to Customer’s next invoice after submission of a Service Credit Request and validation by Arctera that a credit is due to Customer.

“**Service Credit Request**” means the SLA credit request a Customer submits to Arctera by creating a technical support case. Information on how to create a technical support case may be found at https://www.veritas.com/support/en_US.html.

“**Service Order**” means one or more of the following applicable documents which further defines Customer’s rights and obligation related to the Service: an Arctera certificate or a similar document issued by Arctera, or a written agreement between Customer and Arctera, that accompanies, precedes or follows the Service.

“**Software Component**” means a Service Component consisting of Arctera software in object code format, as may be required by a Service, which must be installed by Customer outside of the Tenant, in order to receive the Service, or some portion thereof.

“**Suite**” means a collection of Services sold together as detailed further in this Service Description.

“**Tenant**” means the isolated compute, storage, and networking resources and related configuration that is hosted by Arctera in third-party Infrastructure, such as Microsoft Azure, and that is dedicated to Customer.

“**User**” means any mailbox or account to be archived under the Service, including all Customer mailboxes or accounts, shared mailboxes or accounts, all mailboxes and accounts that send and/or receive mail, and any other mailbox enabled objects, as well as Customer’s social media, chat, collaboration, or messaging services to be archived under the Service. Mailboxes created as M365 Groups (which Customer may use in place of distribution lists) do not count as Users.

“**WORM**” means write once, read many. WORM is offered for some Services on either a 7-year basis or a 10-year basis.

Legacy Service Offerings

The following legacy Service offerings are not actively sold to new customers; however, various existing customers may still be actively using these Services.

Individual Service Offerings

Service	Meter	Description
Veritas Alta Archiving Discovery Option	Per User Per Month (PUPM)	Veritas Alta Archiving Discovery Option is an email archiving service designed to expedite specific topic or discovery (eDiscovery) requests, enforce Email use policies and to retain data for customer defined periods.
Veritas Alta Archiving Personal Option	Per User Per Month (PUPM)	Veritas Alta Archiving Personal Option is an email archiving service designed to let individual users search their personal archived information.
Veritas Alta Surveillance (formerly Advanced Supervision)	Per User Per Month (PUPM)	Veritas Alta Surveillance allows Users in regulated industries to support supervisory requirements for electronic communications, including reducing audit review time, minimizing compliance risk and increasing organizational efficiency. <ul style="list-style-type: none"> • A customer must also have a corresponding number of eDiscovery licenses for all Users of this Service. • This Service is available with a (standard) seven (7) year or (optionally for an additional fee) a ten (10) year retention period. (See Retention Periods section for more information.)
Enterprise Vault to Veritas Alta Archiving Conversions (Cross Grades XGRD)	Per User Per Month (PUPM)	Cross Grades allow an existing on-premise Enterprise Vault Customer to transition to a Veritas Alta Archiving Service offering. <ul style="list-style-type: none"> • Data import of up to 2 GB (1,024 GB = 1 TB) per User is included at no additional charge under these cross grades for new customers. Data import must be completed within one year from the start of Service. Any additionally needed capacity per User or import after the first year of Service will be subject to a data import fee. Please see additional considerations for the Data Import/Ingestion Option below.
Veritas Alta eDiscovery Read Only Historical Access (DA Read Only)	Per GB Per Month	Read Only Historical Access allows a customer to retain access to Customer Data within the eDiscovery archive. The Customer Data must remain static and, therefore, no new journaling is allowed on such an archive.

Legacy Add-on Options

Add-on Option	Meter	Description
Bloomberg® Option	PUPM	This option provides secure capture, indexing and archival of Instant Bloomberg and Bloomberg messages for customers in the financial services industry using a Bloomberg Terminal.
CloudLink Option	No charge	This option synchronizes data between Customer’s Microsoft Exchange Active Directory and Veritas Alta Archiving.
File Archive Option (“box.com Add-on”)	PUPM	This option is for files stored on enterprise www.Box.com accounts. It allows Customers to map Box® users to the archive by Email address, then captures and indexes Box® files after securely transmitting them in Email to the archive. Files may then be searched and accessed during the eDiscovery process or for individual use. Administrators can select any combination of compatible file types.
Folder Sync	PUPM	This option allows a Customer to view Emails in a manner similar to the Email organization in the User’s message folders. As Users create message folders and/or move emails between such message folders, the synchronization feature subsequently replicates the folder structure inside Personal Option.
Office 365 Option	No charge	This option synchronizes data between Customer’s Office 365 environment and Veritas Alta Archiving.

Legacy Bundled Suites¹

Suite	Meter	Personal Option	Discovery Option	Veritas Alta Archiving Classification ²	Veritas Alta Surveillance	Storage & Retention Options ³
Veritas Alta Archiving (Discovery and Personal)	Per User Per Month (PUPM)	●	●			Non-WORM storage
Veritas Alta Archiving (Discovery and Personal Continuity)	Per User Per Month (PUPM)	●	●			Non-WORM storage
Veritas Alta eDiscovery Suite (formerly Advanced eDiscovery Suite or Govern Suite)	Per User Per Month (PUPM)	●	●	●		Non-WORM storage 7-year retention with WORM storage 10-year retention with WORM storage
Veritas Alta eDiscovery Capacity Suite with Veritas Alta Capture ⁴	Per 100GB or 1 TB Per Month	●	●	●		Non-WORM storage
Veritas Alta Surveillance Suite	Per User Per Month (PUPM)	●	●	●	●	7-year retention with WORM storage 10-year retention with WORM storage

¹For the avoidance of doubt, effective January 1, 2025, none of these Bundled Suites contain any Continuity. These affected Suites leveraged a third party who has discontinued all support for Continuity.

²Veritas Alta Archiving Classification allows the Customer to automatically classify items based on their content and metadata, which can then be searched and filtered using Veritas Alta eDiscovery according to the tags that have been assigned to them.

³WORM storage refers to Write Once Read Many, or immutable storage. (See the Retention Periods subsection of the Additional Service Requirements section below for more information.)

⁴Veritas Alta eDiscovery Capacity Suite entitles a customer to Arctera Insight Capture, in accordance with its Service Description at <https://www.arctera.io/license-agreements> and includes most available Connectors available with the exception of the following, without limitation: non-Arctera third-party Connectors and fee-based transcription services Connectors.
